***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 recites "the electric current" there is no basis for this limitation. Claim 8 also recites "the heating element" this should "the embedded heating element".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 10-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP0 798 515 A. EP 0 798 515 A discloses a sheathed-element glow plug (i) for an internal combustion engine consisting of a plug housing (2), a connection part for the electrical current that is located on said plug housing, and a tube (3) comprising an embedded heating element (8), wherein the connection part and the heating element are electrically coupled by means of a connection bolt (5a, ii) and a contact element (6), characterized in that the connection bolt and the contact element are partially

surrounded by an electrically insulating plastic sleeve (4) inside the housing (2) (see column 2, lines (39-44)).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0 798 515 A in view of Geissinger et al.(U.S.Pat.6,759,631). EP 0 798 515 A does not explicitly show a clamping sleeve, a plurality of plastic pieces or a graphite tablet. Geissinger discloses a ceramic sheathed element glow plug with electrically conductive powder pellet contacting element and a method for making same that shows a contact element (12) made of graphite and a sleeve element (8). It would have been obvious to use a graphite contact and a sleeve element as taught by Geissinger because the graphite conducts electrical current and the sleeve serves as an insulator.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshikawa, Selmi, Mizuno and Muller are cited to show structure similar to the claimed invention.
